

**Use:**

Air replacement in underfloor space in server rooms etc., in low- and medium-pressure installations.

Assembly:

In floors as an element of elevated floor systems, in a place of elevated floor panel.

Construction:

Inner frame and blades made of embossed aluminium profiles. Permanent mounting of blades in a form of foundation grille that can be dismantled. Resistant to load to 3kN. Equipped in bolts to level regulation in order to fit it to an appropriate type of elevated floors .

Material:

Aluminium, alloy 6063.

Surface finishing:

Natural anodized aluminium or powder varnish layer in a colour in accordance with the catalogue RAL.

Flow adjustment:

With the use of contra-rotation damper type P. Setting air flow takes place from face without the necessity of dismantling a grille.

Certificates:

Technical recommendation: RT-ITB-1148/2010

Hygiene certificate: HK/B/1844/02/2007
