

Instructions for using the diagram for choosing air supply diffusers ASN

Example (colours adequate to lines):

- Air stream range $Q=700 \text{ m}^3/\text{h}$
- Range $L_{0,25} = 3,5 \text{ m}$

Diagram reading:

- Diffuser size 623x623
- Pressure loss: 2 Pa
- Maximum outlet velocity: 1,2 m/s
